

**E.P. SYSTEMES**

**[EPSYSTEMES.COM](http://EPSYSTEMES.COM)**

[contact@epssystemes.com](mailto:contact@epssystemes.com)

**ONLY FRENCH  
MANUFACTURER OF  
PNEUMATIC PUMPS  
AND SKIMMING.**

## **SOME OF OUR EQUIPMENT ARE AVAILABLE FOR RENT**

- *Venting unit*
- *Stripping unit*
- *Activated carbon filter air and water*
- *Pumping and skimming systems*
- *Measurement and sampling systems*

*Contact us for rates and conditions*

## **OUR SOLUTIONS**

1

### **Pumping and skimming**

Design and Manufacture (100% French) pump and skimmer for depollution of the sites (refinery, leachate, etc ...). Our pumps and skimmers are fully automatic and pneumatic. Manufacture of strip skimmers for industries: consult our equipment range «Le Skimmer Français»

2

### **Air treatment**

Design and manufacture of equipment for processing

- **Treatment of odors Biofilter or activated carbon** : streatment plants, Methanization, etc.
- **Treatment of industrial gaseous waste** : Activated carbon, catalytic oxidation, Biofilter, etc.
- **Soil decontamination** : Venting unit, sparging, Ventilation, filtration

3

### **Water treatment**

Design and manufacture of water treatment units

- Mobile unit for Base life (France and export)
- Mobile unit for depollution of groundwater (polluted sites and soil): stripping
- Design of units according to specific demand and problematic customers
- Assistance with on-site operation: supply and installation of filtration sand, activated carbon, etc.

4

### **Sampling, Sampling and Measuring Equipment**

- **Sampling equipment** : 12 and 24 volt pumps, SPP3T large electric pump depth, etc.
- **Sampling equipment** : Water: bailers (Pehd, PVC, stainless) all dimensions and capacities, Waterra system (stainless steel valve and Pehd, all models) / Air : filter syringes, manual pump and consumables, PID measurement and gas control, etc... / Soil: Tare, manual sampling system and consumables
- **Measuring equipment** : Hydrosen level measuring probe / Measuring sensor : Pressure, temperature and conductivity - «Leveline» / Interface probe / Water analysis system (Hanna, etc...)

### OUR EXPERTISE

**23** years in the environmental field

**3** main areas of application: water, air, soil

**international presence :**

*Brazil, Italy, Canada, Ireland, Mauritania, Qatar, Ivory Coast, Germany, Morocco ...*

**E.P.Systems is a structure experienced and dynamic, specialized in the problems environmental.**

Our products are developed specifically for the remediation of contaminated soils, groundwater and air or treatment toxic fumes on sensitive sites.

E.P.Systems will accompany you in your projects, carries out technical and tailored diagnoses for solutions keys in hand.

Designers, manufacturers, distributors, we provide both special units of treatment or pneumatic systems, small equipment, consumables or still spare parts.

Our active presence on the international also allows to have acquired know-how recognized worldwide.

## **EQUIPMENT SPECIALISTS FOR WATER, AIR AND SOIL TREATMENTS.**

### **OUR SERVICES**

#### **SITE INSTALLATION**

Our technical teams are at your disposal provision for the installation and maintenance of water and air treatment equipment.

#### **DESIGN AND MANUFACTURING**

Pneumatic pumps for skimming of hydrocarbons (LNAPL, DNAPL) and the leachate pumping (in I.S.D.N.D or landfills), realization of fixed or mobile units for processing water, air, soil or waste, and mobile or fixed units in biofiltration (air and water).

#### **TIPS AND ENGINEERING**

Research and development custom manufactures and specific problems.

#### **SPECIFIC MATERIAL**

For environmental audits and studies hydrogeology: measurements, pumping and sampling of groundwater and superficial, as well as all sampling equipment for polluted sites and soils.
